Gentle. Controlled. Planned first.

This 2-day course teaches Dr Sam Park's approach to full-arch implant treatment - how to plan, make the right surgical decisions and achieve stable results without unnecessarily aggressive surgery.

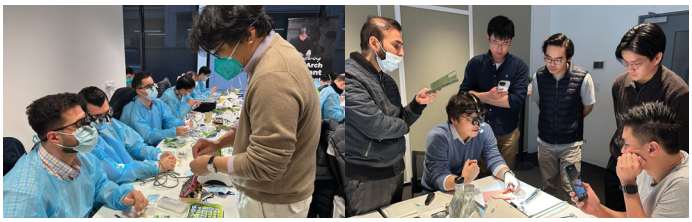
Director's clinical cases – Dr Sam Park

01 Key Learning Outcomes

- Maxillary and mandibular anatomical considerations
- Pre-operative planning: anatomy, function and aesthetics
- Prosthetically driven surgical treatment protocols
- Full-arch materials and their space requirements
- How to utilise Multi-Unit Abutments
- Key principles of immediate loading
- The digital workflow for full-arch cases

02 Hands-On Training

- Maxillary and mandibular implant placement for full fixed restorations
- Immediate loading denture conversion for same-day delivery
- Full-arch digital impression using intraoral scanner and scanbodies



03 What's Included

$7,000 worth
of first-case support
A–Z full set supplied.

- **2-day lectures & hands-on**
- **Peer learning via WhatsApp group**
- **Lifetime Study Club, every 2–3 months**

COURSE DIRECTOR

Dr Sam Park

Full-time implant clinician with an emphasis on advanced hard and soft tissue grafting. ICOI Fellow & Diplomate. Keynote speaker for Dentium Implant Australia.

"He will not hesitate to talk about his failures – something very rare in the professional circuit."
★★★★★ Daniel T

"All-on-X in depth, with both solid theory and practical hands-on training."
★★★★★ Arik P

Start full-arch the gentle way.
