# ADVANCED IMPLANT HANDS-ON COURSE

New Paradigm of Hard & Soft Tissue  
Making with Novel Approach  
of Complication Control

Upon satisfactory completion of this Seminar,  
the course will be awarded 14 CPD Certificate hours.

Date & Time

**14 -15 October 2022**  
9am-5pm, Fri - Sat (2Days)

Location

**Pullman Sydney Olympic Park**  
Olympic Boulevard  
Sydney Olympic Park  
NSW 2127

Fee (Incl.gst)

**\$2500**

## COURSE SUMMARY

The overall aim of the Advanced Implant Master Course is to improve your surgical skills and teach advanced techniques implant immediate placement and grafting.

In fact, this course has been designed to stimulate your confidence and broaden your career even further.

2022

# ADVANCED IMPLANT HANDS-ON COURSE

## LECTURE DR. In Seong Jeon | DDS, MSD, PhD

- Seoul National University Dental School (OMS)
- PhD in Seoul National University
- Inje University Oral & Maxillofacial surgery department professor
- Harvard School of Dental Medicine Implant Center as a Visiting Professor
- Part-Time Professor of Inje University & Seoul National University
- Director of AIC / AAO International Director
- S&H Dental Clinic Chairman

We encounter many different situations when we perform dental implant surgeries.

It may be controversial to suggest the need for newer tools when the conventional equipment is already producing good results, but I intend to rid of such controversy in one particular area of dental implant surgery.

My focus is clear and precise.

When it comes to the method of creating GBR, maxillary sinus lifting and soft tissue grafting from upper and lower anterior region and the treatment of broken screws and peri-implantitis that occur a

few years after prosthesis delivery, their improvements are very gradual.

The core of the treatment did not change but the applications of the details need to be clearer, simpler, and more predictable.

There is nothing new under the sun.

It is my foremost intention to allow the clinicians to easily access, utilise and apply all the improvements and new concepts to their practice.

In this two-day symposium, I'd like to discuss the results of my 26 years of clinical trials with you.

## TESTIMONIALS

### | Dr.Jeon's seminar was fantastic! ★★★★★

He is an extremely enthusiastic and knowledgeable speaker when it comes to all things to do with implants. Always happy to answer any questions and due to his extensive experience was able to comment with certainty what would and wouldn't work as he has tried almost everything that was asked by the other dentists. He was more than happy to share his techniques and what to avoid (unlike some other presenters who just show you what they can do but not the technique used to achieve the result and equally as important - what techniques have been tried and haven't worked) with us and has made quick reference summaries for us to refer back to. I just wish we had more time with him so we could pick his brain some more and learn from his wealth of knowledge and experience.

Dr. John Tsougranis (BDS, MICOI)

### | It was such a wonderful trip and great seminar. ★★★★★

I have learned a lot. It is my first seminar with Dr.Jeon, what a overwhelming experience for me. There are a lot of catch up and remember. I will start my first anterior immediate implant next Thursday straight after an extraction of failed post-core-crown. Really exciting! Thank you very much for organizing everything for us. Looking forward to start the journey with Minimax soon.

Dr. Annie Cao

### | What a fantastic course run by Minimax. ★★★★★

Dr. Jeon is absolutely amazing and his live surgery is a sight to behold- genius with his knowledge and hand skills to match.

Dr. Kumsuz

## CURRICULUM

### Sinus crestal approach

Core lifting technique without bone filler

### GBR

Question mark technique from non-resorbable to resorbable membrane by BT(bonetac) or WCC(widecovercap) stabilization

### Ridge split and expansion by simple instrument

Spreading / Rotation / Lever action

### CTG on Upper & Lower implant or natural dentition by Double blade

### Consideration of removal of broken screw

### Impact of Implantoplasty in peri-implantitis management
