Course Overview

Led by Dr. In Seong Jeon, with over 30 years of clinical expertise and 50,000+ implant placements, this intensive 3-day course is designed to elevate your implant practice. From mastering primary stability and stress-free placement techniques to advanced GBR, immediate loading, and soft tissue management including CTG and FGG, the program offers practical, hands-on training every step of the way. You'll also gain strategies to manage complex cases like vertical augmentation, sinus infection control, and esthetic zone reconstruction. Each session is structured to deliver clinical precision, predictable outcomes, and real-world confidence.

Curriculum**DAY 1 Foundation Excellence: Mastering the Fundamentals****Primary Stability / Position / Angulation / Depth**

- Master the fundamentals. Ensure your success of implant
- Essential critical factors from 30-year clinical data
- Apply the Zero-Stress Philosophy to avoid overcomplication

Hands-on

- Predictable implant placement cases with various bone conditions
- Primary closure and tension-free wound management

DAY 2 Intermediate Mastery: Advanced Techniques & Immediate Solutions**Immediate Placement / Horizontal Augmentation / FGG / GBR Techniques**

- GBR techniques selectively for immediate and delayed implant
- FGG and soft tissue management
- Apply immediate loading protocols with proper patient selection criteria

Hands-on

- Ridge augmentation techniques with various bone conditions
- FGG harvesting and application techniques
- Immediate placement protocols for different indications

DAY 3 Expert-Level Challenges: Complex Cases & Complication Control**Vertical Augmentation / CTG for Root Coverage / Sinus infection control / OAF Closure**

- Use vertical GBR techniques
- Apply CTG in esthetic zones and for root coverage
- Master Complication management
- Mastery of Various Suture Techniques
- Your complication case

Hands-on

- CTG harvesting and suturing techniques for optimal soft tissue outcomes
- OAF closure protocols and sinus infection management strategies
- Complication management protocols for various implant failures

Testimonials

Dr. Jeon's seminar was fantastic!

He is an extremely enthusiastic and knowledgeable speaker when it comes to all things to do with implants. Always happy to answer any questions and due to his extensive experience was able to comment with certainty what would and wouldn't work as he has tried almost everything that was asked by the other dentists. He was more than happy to share his techniques and what to avoid (unlike some other presenters who just show you what they can do but not the technique used to achieve the result and equally as important – what techniques have been tried and haven't worked) with us and has made quick reference summaries for us to refer back to. I just wish we had more time with him so we could pick his brain some more and learn from his wealth of knowledge and experience.

Dr. John Tsougranis (BDS, MICOI)

It was such a wonderful trip and great seminar.

I have learned a lot. It is my first seminar with Dr. Jeon, what a overwhelming experience for me. There are a lot of catch up and remember. I will start my first anterior immediate implant next Thursday straight after an extraction of failed post-core-crown. Really exciting! Thank you very much for organizing everything for us. Looking forward to start the journey with Minimax soon.

Dr. Annie Cao

What a fantastic course run by Minimax.

Dr. Jeon is absolutely amazing and his live surgery is a sight to behold- genius with his knowledge and hand skills to match.
