**7**

hours

**Course Overview**

This course presents simplified yet clinically precise workflows for edentulous patients, enhancing both efficiency and patient comfort. Using the JB Tray, participants will learn how to combine custom tray fabrication, final impression, and jaw relation records in a single appointment, supported by digital processing and a live demonstration. The program also introduces the JB Fork system, which integrates CBCT imaging and anterior reference points to enable one-step surgical stent fabrication without repeated impressions. Through practical demonstrations, attendees will see how this approach streamlines implant surgery while maintaining accuracy. The course concludes with insights into plasma surface treatment in implantology, highlighting its role in advancing clinical outcomes.

**Key Learnings**

- Old and New in Complete Denture Procedures: From Custom Tray Fabrication to Final Impression and Jaw Relation – All in One Visit!
- Optimal Combination of JB Tray and Digital Denture Workflow
- One-Step Surgical Stent Fabrication Using JB Fork and CBCT

**Curriculum**

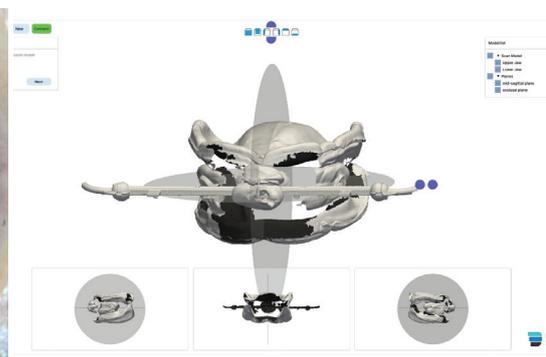

**PART 1 One-Step Denture with JB Tray**

- Fundamentals of jaw relation records in edentulous patients: Determining VD, CR, and the occlusal plane
- The concept of closed-mouth impression and understanding the appropriate external form of dentures
- One-step clinical workflow with the JB Tray: From custom tray fabrication to final impression and jaw relation record in a single appointment
- Digital processing of impressions obtained with the JB Tray
- Live demonstration with an edentulous patient

**PART 2 One-Step Surgical Stent Fabrication with JB Fork**

- Radiopaque JB Fork and the role of six anterior reference points: Registration with CBCT and integration with facial scanners
- One-step avatar creation without additional clinical procedures
- Surgical stent design and its application in implant surgery
- Live demonstration of JB Fork application in a patient case

**PART 3 Sharing the latest insights into plasma surface treatment in implantology**

Director**

## **Prof. Jung Bo Huh**

DDS, MSD, PhD

### **Education**

- PhD, Graduate School of Dentistry, Yonsei University, Korea (2005.09 – 2011.02)
- MSD, Graduate School of Dentistry, Yonsei University, Korea (2003.09 – 2005.08)
- DDS, School of Dentistry, Pusan National University, Korea (1996.03 – 2002.02)
- Visiting Professor, Herman Ostrow School of Dentistry, University of Southern California, USA (2019.06 – 2020.04)

### **Academic & Professional Appointments**

- Chair, Dental Research Institute, Pusan National University Dental Hospital (2024.03 – Present)
- Dental Advisor, Presidential Secretariat of Korea (2022.03 – Present)
- CEO, PNUADD Co., Busan, Korea (2019.11 – Present)
- Chairman, Department of Prosthodontics, PNU Dental Hospital (2015.03 – Present)
- Professor, School of Dentistry, Pusan National University (2011.03 – Present)
- Clinical Professor, Dept. of Advanced Prosthodontics, Korea University Hospital (2009.05 – 2011.02)

### **Research Interests**

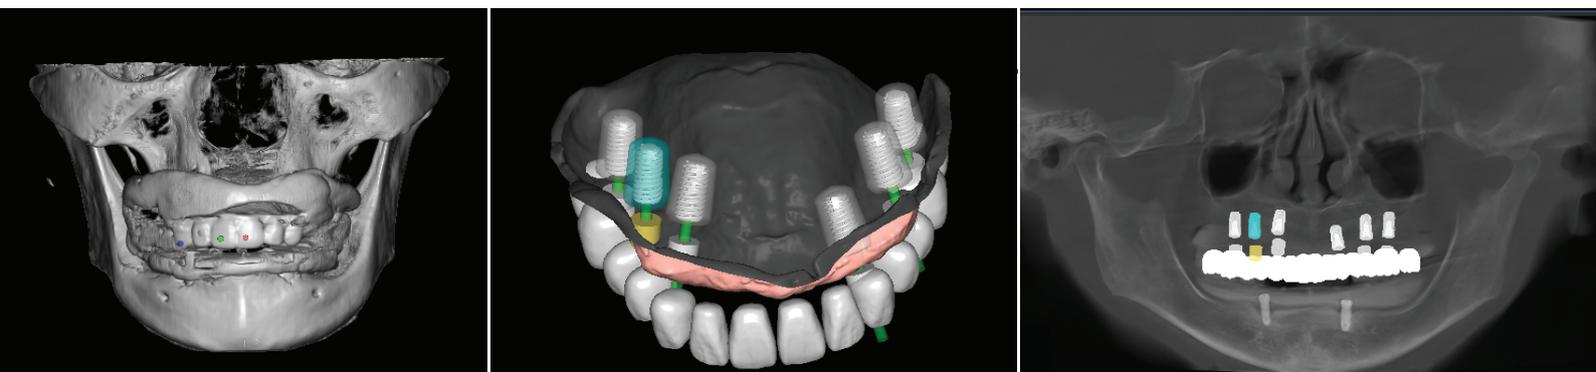

- 3D Printing and Bioprinting in Dentistry
- Bone-Implant Interface and Bone Regeneration
- Clinical Prosthodontics with Dental Implants and Digital Workflow

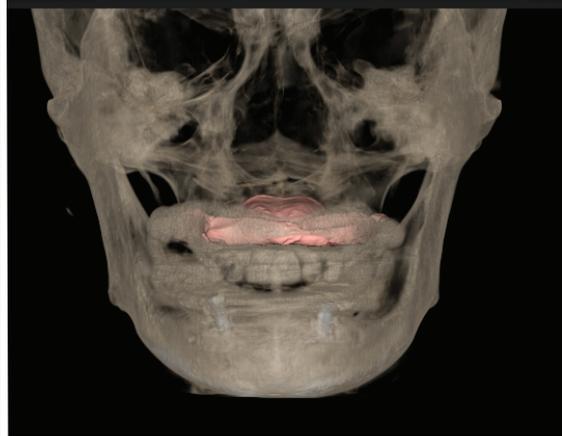

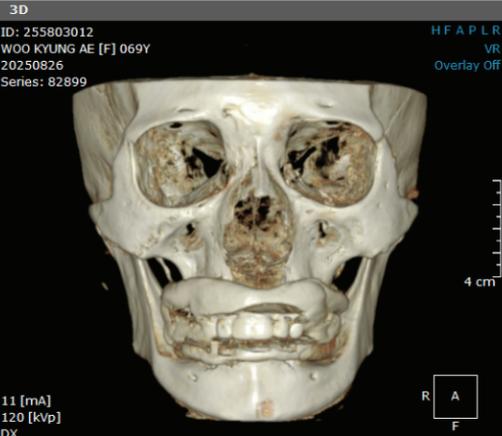

### **Selected Honors & Awards**

- Minister's Commendation, Ministry of SMEs and Startups, Republic of Korea (2018)
- Minister's Commendation, Ministry of Health and Welfare, Republic of Korea (2019)
- Yeon-Song Dentistry Prize, Grand Prize, Korea (2018)
- Young Scientist Award, Korean Academy of Prosthodontics (2012)
- Hatton Award, IADR Korean Division (2010)
- Student Research Fellowship Award, IADR Implantology Research Group (2009)

### **Publications & Patents**

- Over 180 peer-reviewed scientific publications
- Author of 9 books in prosthodontics and implant dentistry
- Holder of 40+ domestic and international patents related to dental technologies
