Course Directors

Dr. David Jang @drdavidjang

- Bachelor of Dental Science (University of Queensland)
- Graduate Diploma in Clinical Dentistry - Conscious Sedation and Pain Control (University of Sydney)
- Current Student - Masters of Science in Oral Implantology (Goethe University)

Dr David Jang is a graduate of Bachelor of Dental Science at the University of Queensland and has ever since worked across multiple locations around NSW from which he attained vast variety of experience in all realms of dentistry. He eventually took up the position as a principal dentist in Canada Bay Dental where he primarily focuses in surgical and implant dentistry. Aside from his astounding career, Dr Jang has always been passionate about mentoring others to follow his footsteps. He values the prospect of mentoring those who aspire to broaden their experiences and further explore implant dentistry.

Dr Young Jae (Jae) Kim @y_j_k__

- Bachelor of Dental Science (University of Queensland)
- Diploma of Oral Implantology (UJI)
- Post Graduate Diploma in Clinical Dentistry (Aesthetic and Restorative Dentistry)
- Post Graduate Diploma in Clinical Dentistry (Oral Implants)

Dr Young Jae (Jae) Kim was born in South Korea, and came to Australia in 2003. He completed his Bachelor of Dental Science at University of Queensland in 2012. He finds all parts of dentistry gratifying, but especially enjoys performing oral surgery and has a keen interest in Orthodontics. He likes to concentrate on preventive dental care and providing continual dental treatment to patients. Dr Young Jae Kim places emphasis on genuine empathetic care for his patients by allocating time in each appointment to discuss concerns and give advice regarding oral health care.

Live Surgery

Course Summary

This course is designed to equip general dentists with the fundamental techniques required for implant surgery such as treatment planning, placing basic implants and restoring implants. The course will span from the introduction of implants to the basic knowledge of surgical and prosthetic aspects of implantology.

The course will have an emphasis on the practical aspects with hands-on sessions on incision, drilling sequence and suturing techniques to instil confidence and remove any fears from placing their first implant.

Course Curriculum

Day 1 : Fri, 23 Oct 2026

1.1.1. Anatomy

- Anatomical structures
 - Mandible / Maxilla / Special Areas
- Radiology
 - Uses of OPG / CBCT / PA radiographs
 - Reading OPG and CBCT
- Case Evaluation
 - Bone density / Radiographic evaluation
 - Tactile sensation during surgery
 - Soft Tissue Evaluation / Bio-type
- Implant Case Selection
 - Planning & Implant selection
 - Different implant connection (conical and butt connection)
 - Why different connections are used in different implant systems
- Conical connection & Platform switching

1.1.2. Understanding the implant system

- Surgery set-up and patient management
- Various implant components and their names
- Dividing these into surgical and prosthetic phases
- What is the best position of implant? (Treatment planning - what photos, radiographs, models are required)

12:30 Lunch

1.2.1. Surgical Phase **Hands-on**

- Explanation of the Surgical kit

Testimonials

★★★★★

Thanks David, Jae and team for good support and making the course easy to understand. Everyone was very nice and helpful throughout the course that made us very comfortable and confident about the implants.

Regards,

- DD Dental. Dr Ravinder. Dr Neha

★★★★★

Thanks David, Jae and Minimax team for the hands-on implant course. Very informative and the hands-on implant was great!

Regards

- Dr. Michael Han

★★★★★

Awesome course - Hands-on live surgery really makes this stand out. Suggestion of making this over a few weekends and having multiple sessions to get students into doing more implants. Thanks Dr David and Dr Jae and Minimax amazing team for the hands-on implant course quite an experience. Very informative and encouraging for the students to start doing implant course.

Regards,

- Dentist Near me Toongabbie. Dr Gulia

★★★★★

I am very happy with this course. The course content was well represented and structured. It covers a broad spectrum of topics for basic implant treatment planning and clinical skills. Anyone who does not quite know where to start in this area, I would strongly recommend to start here. Both David and Jae are very good mentors and all other staff are lovely and helpful.

★★★★★

Course was well presented and structured in a logical way that was easy to follow for beginners.

Great guidance for the live surgery to give confidence in early cases.

★★★★★

Very comprehensive but clear lectures.

Straight to the point and easily digestible information.

Well organised by Minimax and wonderful guest speakers / teachers

- Dr. Constance Ju

★★★★★

I am happy with this course. It builds confidence in placing simple implants. The course is very well structured and presented. Both David and Jae are very nice and they were helpful/calm in the live surgery, walking through every step. I would highly recommend this course to dentists looking to start their first implants. Thank you!
