

Implantology

Advanced Immediate Implant Course

Lecture by Dr. Youngsam Kim

SYDNEY Minimax Training Centre
8-9 Aug 2026, 9:00am - 5:00pm

14 CPD Points
\$1500 ^{+GST}

Course Overview

This course is designed to equip general dentists with essential knowledge and techniques for successful immediate implant placement. It is an intermediate-level course tailored for dentists with experience in minor dental surgeries, though prior implant placement experience is not required. The course will cover key aspects of immediate implants, including their reliability, precise drilling techniques, and bone grafting considerations. Additionally, participants will gain a comprehensive understanding of immediate implant protocols for different tooth positions.

Key Learning Outcomes

All course materials are included, and lecture and participation credits will be awarded. By the end of this course, participants will get the knowledge of :

- Can Immediate Implants Be Trusted?
- Drilling Techniques for Immediate Implants
- Bone Grafting in Immediate Implant Cases

Immediate Implant Protocols for Each Tooth: Including All Teeth from the Lower Molar to the Upper Incisor

Seminar Curriculum

DAY 1 Fundamentals

- Drilling Techniques for Immediate Implants
- Bone Grafting in Immediate Implant Cases
- Immediate Implant Protocols for Each Tooth: Including All Teeth from the Mandibular First Premolar to the Mandibular Canine

DAY 2 Crestal Sinus Lift

- About the maxillary sinus
- Pathologic conditions of the sinus
- Crestal vs Lateral
- How to open a Lateral Window
- History of crestal approach
- Crestal sinus lift kits
- How to do crestal sinus lift
- Why osteotome?
- How much sinus lift is appropriate?
- What should be placed in the sinus?
- How much bone should be grafted in the sinus?
- Sinus lift & Septum
- Immediate Implant placement & sinus lift
- What to do if the sinus is perforated?

Course Directors

Dr. Youngsam Kim

DDS, MS, PhD

Dr. Youngsam Kim is a globally renowned instructor in immediate implant placement and wisdom tooth extraction. With over 20 years of clinical and academic experience, he has taught thousands of dentists worldwide, focusing on safe, predictable, and minimally invasive surgical techniques.

He is the Principal Dentist at Gangnam Dental Office (since 2001) and has served as Associate Professor at major Korean dental schools, including Jeonbuk National University, Pusan National University, and Yonsei University. He also holds key leadership roles in implant education as Faculty Member of Osstem (Hiossen) Implant Korea, Head Director of Dentis Implant Continuing Education, and Director of multiple surgical academies in Korea and the USA.

Dr. Kim is an accomplished author of several influential textbooks, including:

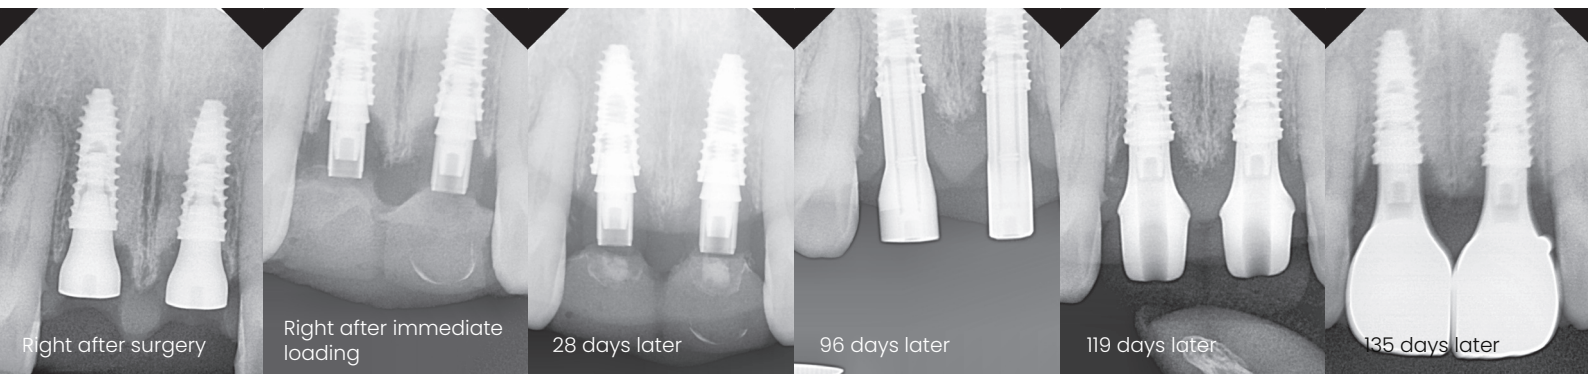

- Extraction of Third Molars: Easy Simple Safe Efficient Minimally Invasive & Atraumatic (2018)
- ESSE Mastering Dental Implants (2021)
- Atlas of Implants (2025)
- Simple Immediate Implants (2025)

He has completed advanced training programs at the University of Toronto and preceptorships at UCLA in Periodontics and Oral & Maxillofacial Surgery. Since 2022, he has been a professor in the Master Program in Implantology and Third Molar Extraction at UniCamilus International Medical University in Rome, Italy.

Clinical Cases Upper anterior teeth

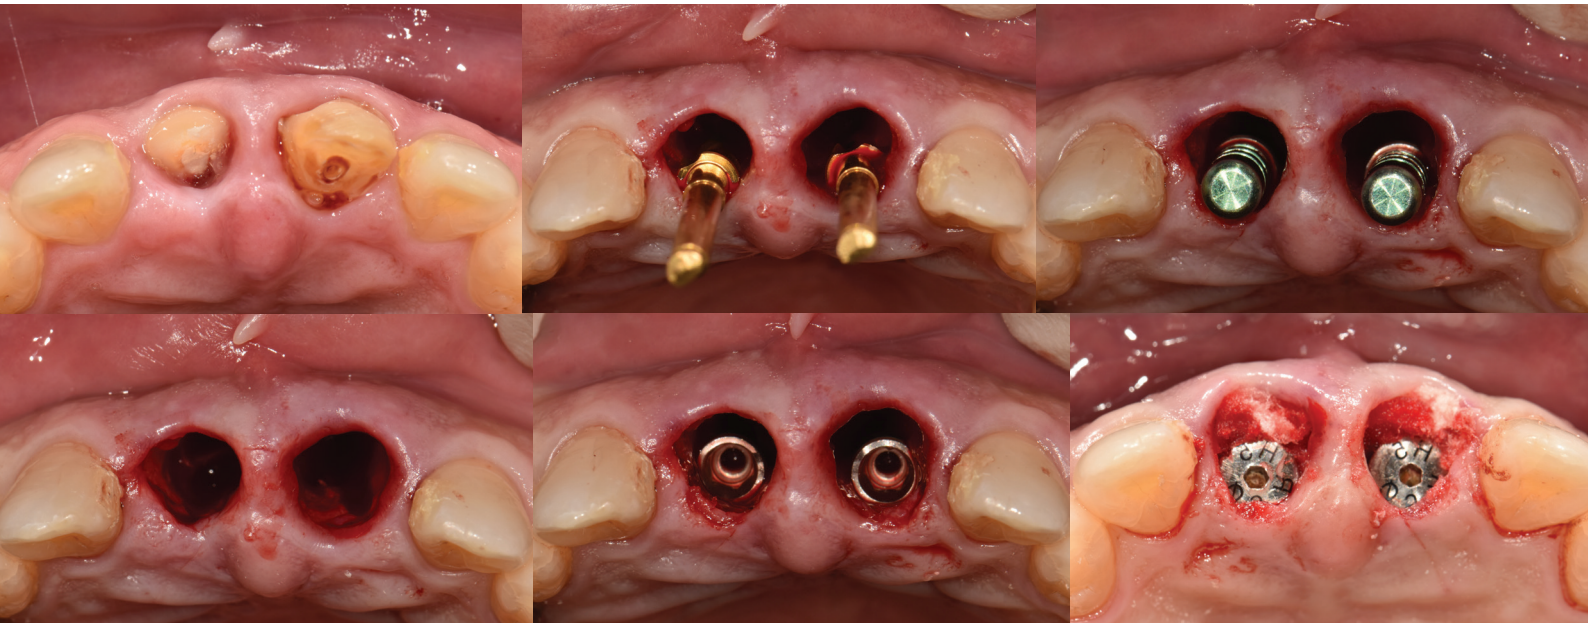

After placement
