

You already see the tight jaw. Do you have a diagnosis for it?

And the gummy smile your patients bring up - that conversation is already happening.
Just not with you. A day and a half on the facial anatomy that answers both, led by one clinician.

Seminar Title

The Digital TMD & Facial Aesthetics Masterclass

Treat the joint. Contour the face. Prove the result.

Best suited to

For general dentists managing TMD
who want to extend into facial aesthetics
— no injectables experience required.

Date

7-8 Nov 2026

Sat, 9:00am-5:00pm
Sun, 9:00am-1:00pm

Venue

Four Seasons Hotel

199 George St, The Rocks NSW 2000

Lecturer

Prof Seong Taek Kim

CPD

11 CPD Hrs

One anatomy, one needle

The masseter that causes jaw pain is the same muscle that shapes the jawline.

The anatomy you already work in - for TMD - extends further
into the face than most dentists currently treat.

What you leave with, Sunday afternoon

01	02	03	04	05
A diagnostic pathway for TMD	A therapeutic injection protocol	An aesthetic treatment menu	A rehearsed complication plan	A splint workflow, scan to fit

Day 1
